

Batik Indah

Importers of Unusual Worldwide Crafts & Furniture

Java Teak Furniture Factsheet

Our range of Javan furniture is hand crafted in a village called Pundang which is 40 miles south of Yogyakarta in Central Java. The family run business is situated in a factory next to a river in an idyllic location.

We have been visiting Java for over 14 years and our factory manager has grown with us from pedalling a Becak for a living to employing 47 workers. All 47 are paid well above the usual wage for this work and we guarantee no children under the age of 16 years are employed.

Batik Indah has sought to create a very natural and clean look to their new range whilst maintaining their tradition hand made quality and feel. The colour of this range is light, almost honey, and is finished beautifully with layer upon layer of french polish producing a nice satin effect. Particularly beautiful is the dining table with drawers and our fantastic Borneo chair that accompanies it. All the furniture uses sustainable Teak that is kiln dried by our suppliers in their workshops in Central Java, Indonesia..
