Root Furniture Factsheet

Our Root furniture is made from the very base of felled Teak trees. As the by product of the Javan timber industry they would normally be burned or left to rot but we travel to East Java and buy in vast quantity for our suppliers who take them and then craft these wonderful items of furniture by hand to a high standard in their workshops in Central Java.

These are unique hand carved pieces and very rarely are any two the same. Therefore designs may vary from those shown.
